RECTANGULAR BATHTUBS
INSTALLATION AND OPERATION INSTRUCTIONS

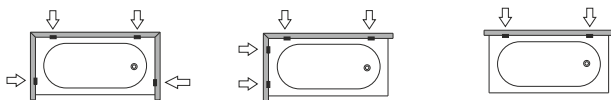

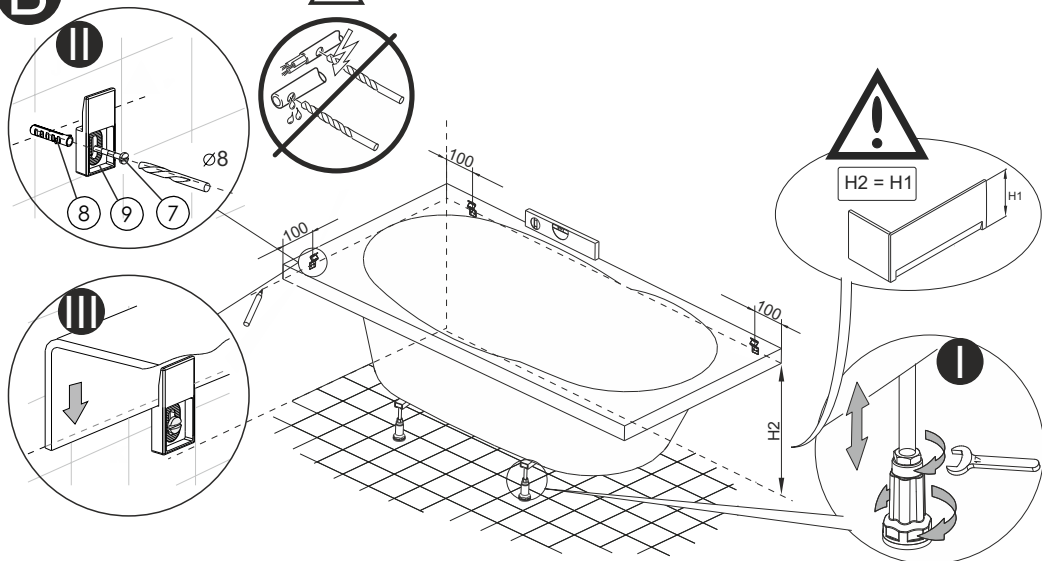

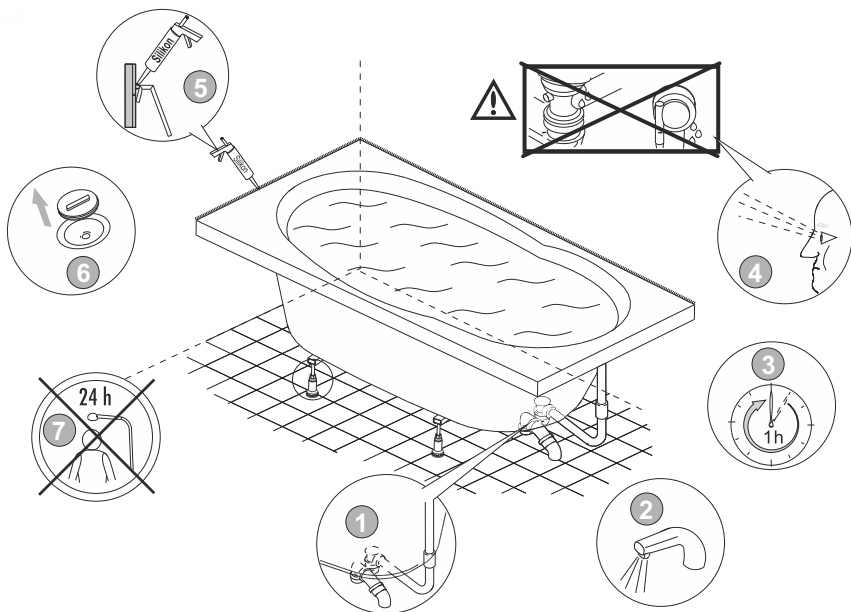

Please check the appearance and completeness of the product before the assembly.

INSTALLATION: Producer recommends installation by the qualified installer to keep optimal parameters of product. It should be remembered that various type of walls need various type of fixing materials. Producer equipped product with standard installation elements - stretchers to the walls made of solid materials - like concrete, brick, silicates, etc. If the walls are made of other materials (for example reinforced plasterboard walls) proper stretchers should be bought within one's capacity. Product should be installed in a way which enables an easy dismantling in case of failure, so that the tiles were not damaged. The Shower tray/bathtub should be sealed and slided to the glaze. **EVERYDAY USING:** Product surface should be washed out with clean running water after each bathing. Remaining water drops should be removed with soft cloth to dry (do not use cloths or sponges, that contain rough and friction elements in the structure). It should be periodically cleaned with soft cloth or sponge using only gentle chemical agent for cleaning and maintenance of sanitary acrylic. Do not use cleaners containing drawing the surface elements, for example: powders. **ATTENTION:** During wetting, especially with soap, shampoo, bath oil using, etc., most of the shower trays/bathtub surface can be very slippery! **SMALL REPAIRS:** Scratches (not bigger than 0,2mm) can be removed by polishing the surface with waterproof abrasive paper no 400, then with abrasive paper no 600 and 800, until the scratches are completely removed. The surface then should be polished with an abrasive compound used for car lacquer to restore its shine. In case the acrylic surface looks mat, it is recommended to polish it with an abrasive compound until it looks shiny again. **Notice:** The producer reserves the right to introduce changes of technical parameters and colours of described elements.
